Math In Our World

Synopsis

The author team of Dave Sobecki and Allan Bluman created an engaging text and digital program aimed at meeting the needs of today's liberal arts math students, resulting in the third edition of *Math in Our World*. This revision focused on further development of critical thinking skills through several hundred revised exercises and examples, still presented within the hallmark style of the *Math in Our World* program. Carefully chosen questions help students to form a connection between relevant examples and the mathematical concepts of the chapter. Using the engaging writing style characteristic of the text, the authors support concepts through abundant examples, helpful practice problems, and rich exercise sets. The author team was also deeply engaged in the development of the Connect and LearnSmart online content to help ensure a consistent experience for students regardless of medium. The result is an exceptionally engaging program that is able to both effectively and creatively convey the fundamental concepts of a liberal arts math curriculum to even the most hesitant student.

Customer Reviews

I downloaded this as a kindle app and it's fine, the only thing is the majority of the problems in the answer key aren't correct so there's no way to check your work. Formatting is a lot better on the iPad as well.

Same garbage re-released to cash in on college students that need the book for a class.

I used this text in my math class two semesters ago and loved how easy to read and follow along it is. Very well written and helpful.

Excellent text book! Wish I had it before!

Thanks

Being the very picky person that I am, when I rented this book I was nervous about its condition. When I received it in the mail it was brand new! Love it!

Excellent arrived on time
