Universe: Solar System, Stars, And Galaxies

Synopsis

With their best-selling astronomy textbook, *UNIVERSE: SOLAR SYSTEM, STARS, AND GALAXIES*, authors Mike Seeds and Dana Backman help you understand your place in the universe--not just your location in space but your role in the unfolding history of the physical universe. To achieve this goal, the authors focus on two central questions: "What Are We?" which highlights your place as a planet dweller in an evolving universe, guiding you to better understand where we came from and how we formed; and "How Do We Know?" which provides insights into how the process of science can teach us more about what we are.

Book Information

Paperback: 528 pages

Publisher: Brooks Cole; 7 edition (January 1, 2011)

Language: English

ISBN-10: 1111425671

ISBN-13: 978-1111425678

Product Dimensions: 10.8 x 9 x 0.9 inches

Shipping Weight: 2.8 pounds

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (3 customer reviews)

Best Sellers Rank: #1,141,658 in Books (See Top 100 in Books) #100 in [Books > Science & Math > Astronomy & Space Science > Solar System](#) #1126 in [Books > Textbooks > Science & Mathematics > Astronomy & Astrophysics](#) #2383 in [Books > Science & Math > Astronomy & Space Science > Astronomy](#)

Customer Reviews

Great book that gives us an idea about universe. If you want to know some of the stuff about universe go for it.

I had a horrible professor for this class. The textbook kinda saved me in passing. Gorgeous images in this one too, but that is probably typical of astronomy textbooks!

It is an excellent book however you have to have the feedback with other books
