Peacemaking Among Primates

Synopsis

Does biology condemn the human species to violence and war? Previous studies of animal behavior incline us to answer yes, but the message of this book is considerably more optimistic. Without denying our heritage of aggressive behavior, Frans de Waal describes powerful checks and balances in the makeup of our closest animal relatives, and in so doing he shows that to humans making peace is as natural as making war. In this meticulously researched and absorbing account, we learn in detail how different types of simians cope with aggression, and how they make peace after fights. Chimpanzees, for instance, reconcile with a hug and a kiss, whereas rhesus monkeys groom the fur of former adversaries. By objectively examining the dynamics of primate social interactions, de Waal makes a convincing case that confrontation should not be viewed as a barrier to sociality but rather as an unavoidable element upon which social relationships can be built and strengthened through reconciliation. The author examines five different species--chimpanzees, rhesus monkeys, stump-tailed monkeys, bonobos, and humans--and relates anecdotes, culled from exhaustive observations, that convey the intricacies and refinements of simian behavior. Each species utilizes its own unique peacemaking strategies. The bonobo, for example, is little known to science, and even less to the general public, but this rare ape maintains peace by means of sexual behavior divorced from reproductive functions; sex occurs in all possible combinations and positions whenever social tensions need to be resolved. "Make love, not war" could be the bonobo slogan. De Waal's demonstration of reconciliation in both monkeys and apes strongly supports his thesis that forgiveness and peacemaking are widespread among nonhuman primates--an aspect of primate societies that should stimulate much needed work on human conflict resolution.

Book Information

Paperback: 310 pages

Publisher: Harvard University Press; Reprint edition (September 1, 1990)

Language: English

ISBN-10: 067465921X

ISBN-13: 978-0674659216

Product Dimensions: 6.1 x 0.6 x 9.2 inches

Customer Reviews

Very good book for those interested in primate behavior. Or, for those not yet interested in primate behavior. Or for anybody sentient. The writing and storytelling are vibrant enough that you can read this for pure fun. The level of insight, the author's power of questioning, the mix of rigorous observation and inference with boundary-crossing insight, are thrilling and rare. The offer to improve our understanding of ourselves along with primates makes this a book of great power. I read this several years ago and still find myself dwelling on the ideas. I find myself viewing the world differently and more hopefully because of it. A pity I lent my copy out one time too many. Maybe I'll buy another.

Very good book for those interested in primate behavior in general. De Waal is an excellent writer and produces books that flow very easily while keeping you interested.
