Customer Reviews

The 2005 Nautical Almanac rates 57 stars! Any sailor or student of celestial navigation knows this essential book -- just a little less than 1-inch thick -- contains the position of the sun, moon, 4 visible planets and 57 navigable stars for every second of 2005! How do they get it done? It's a masterful piece of mathematics and a "must have" for every person who wishes to practice celestial navigation. Numerous special tables provide vital information that could be needed in special situations (that are also well explained). Finally, there's a great peace of mind you'll enjoy with your 2005 Nautical Almanac, even if you also use an electronic version. When purchased, no batteries will be needed throughout the year...guranteed.-Bob
