Five Last Acts - The Exit Path is easily the best book I have read on the subject of self-deliverance (suicide to end unrelievable suffering). Chris Docker, the author, is clearly a scholar on the subject. The text is richly annotated with background material and references to original articles, a feature usually absent from writing on this topic. The content is authoritative. As a person familiar with the physiology of death, I found the explanations lucid, completely accurate and informative. One of the most compelling aspects of the book is Mr. Docker's clearly stated descriptions of the advantages and disadvantages of each method. Importantly, his extensive discussion of fasting (refusing food and water) debunks misleading statements made by some others who advocate this method above all others. Docker's handling of this issue is balanced, precise and refreshingly unbiased. The main

theme of the book is detailed explanations of each method, including step-by-step instructions with illustrations. Anyone considering self-deliverance would benefit by carefully reading these instructions. In addition to recipes for success, the text compassionately warns of pitfalls for each method that could lead to disability instead of death, an important consideration that is too often ignored. The book benefits from limiting the content to methods for ending life. The Introduction clearly states that related issues, such as legal restrictions, wills, and management of family and care-givers, while critically important to those considering self-deliverance, are not explained here. This allows the author to do a more complete job of the topic at hand, which is practical methods. Five Last Acts is both a major contribution to the field as well as an indispensable resource for people who face intolerable suffering. Docker shows deep compassion and exceptional courage by producing this controversial work. In doing so, he is surely preventing untold suffering.

For anyone interested (should the need arise) in taking control over one's own destiny in the face of an incurable condition, this book covers it all. I have read many publications on the subject but never one with this much information. It's literally as thick as 4 standard books. This book brought me a lot of comfort, knowing I have the knowledge and support by my side for the unpredictability of the future. Thanks to the author for his courage and hard work on writing this one.

This book goes beyond other books on the topic and reflects the author's many years and expertise in the right to die. Authoritative and well-written. I highly recommend it.

nothing not to like here. All the information you need in one place. Not perfect but pretty close. The best part is they tell you what can go wrong and show you how to prevent your own mistakes. Well worth the hefty price tag.

Excellent book! Not only covers the much needed understanding of the physiological aspects of the human body but touches on psychology as well. I thought it a very well written book, which did a nice job balancing all aspects of end of life issues.

God bless all the people who made this book possible for those of us who want the RIGHT to Die with Dignity. And the right to leave our life when we wish, not when the government, lawmakers and medical demigods choose for us. This book should be in every medicine cabinet. Wouldn't you like to go pain-free from this world....now you can

I've read some of the parts of the book, but I especially read the part I was interested in. I never knew or heard of easy-painless ways to die. I never knew Helium could kill you. Helium is the way I would want to go. People have the right to make their own choice in their life. People have no idea why they made that choice, they have no idea what kind of life that person has been through and they have no idea of what lies in the future for this person. Granted the person doesn't know everything that lies ahead, but if there is something in their life that repeats itself and there's no way to cure or fix it then let them make "their own decision". The people out there that are judging our decision should just shut up! You have no idea who we are, you're not a friend, you're not a relative, you're not even a neighbor, you just happen to read this and think you're allowed to judge us. Do "US" a favor go to your bedroom or bathroom mirror and judge yourself!

It's a shame that such a valuable book like this is so expensive and out of reach for so many who would benefit from this book.
