Tropical Soils: Properties And Management For Sustainable Agriculture (Topics In Sustainable Agronomy)

Synopsis

Agricultural ecology, or agroecology, deals in general with the structure and function of agroecosystems at different levels of resolution. In this text/reference, the authors describe in terms of agroecology the tropical environments of sub-Saharan Africa, Southeast Asia, and Latin and Central America, focusing on production and management systems unique to each region.

Book Information

Series: Topics in Sustainable Agronomy

Hardcover: 304 pages

Publisher: Oxford University Press; 1 edition (September 18, 2003)

Language: English

ISBN-10: 0195115988

ISBN-13: 978-0387401157

Product Dimensions: 9.3 x 0.9 x 6.3 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #3,002,042 in Books (See Top 100 in Books) #47 in [Books > Science & Math > Agricultural Sciences > Tropical Agriculture](#) #346 in [Books > Science & Math > Agricultural Sciences > Soil Science](#) #561 in [Books > Science & Math > Agricultural Sciences > Agronomy](#)

Customer Reviews

The book by Juo and Franzluebbers is the best book ever written on the subject of tropical soils and their management for sustainable agriculture. Authors discussed systematically the properties of the major tropical soils, their linkage with agroecosystems and management options based on current knowledge. The book is very informative, easy to read, well illustrated and contains useful tables. It is highly recommended as introductory textbook for students in tropical soils and also for agricultural and environmental workers interested in natural resource management for agricultural production in the tropics.
