Forest Friends Of The Night

Synopsis

This is a chronicle of my growth curve in learning of my natural surroundings and the beings who dwell there. It is factual and is an eye-opener

Customer Reviews

5 STAR | Ordered my book EXPRESS Shipping. Large Print made it easy reading, although some chapters were intense getting into the science behind BF and DNA. Overall 22 short Chapters (some 3 pages to 20 pages) with over 60 photos of BF Signs. Like most people today, the media version of the "monster" was implanted firmly in (his) head. By the end of the book, he learns they are not monsters at all. It was the "Noises in the Night"™, while hunting in 450 acres (surrounded by thousands of acres of Land unapproachable in extremely dense forests) that first alerted Keith the possibility of them being real. It was these woods, he knew so well having hunted on the property for over 30 years. It was his fellow hunters that would report strange Ape and Gorilla sounds. One hunter is completely started by what was recorded on his Trail Cam. Also what animal out there could defecate on rocks, as large as three feet high in the middle of a creek? ! That was just some of the odd and unexplainable events he would start to journal, not knowing it would lead to a book. It would be his wife, also an unbeliever, who would

have the first sighting. Also read a heartwarming story about 11 yr old Elijah who was too young to know the meaning of fear and would sit out at night talking to them as they saw them on the hill. He made a simple request; would it be answered before he left camp? In reference to Elijah, my favorite quote is "I have heard children describe them as hairy people, hairy friends, hairy boys etc. never monsters. Maybe we could learn a valuable lesson from them?"
