Rise And Fall Of San Diego: 150 Million Years Of History Recorded In Sedimentary Rocks

Synopsis

Rise and Fall of San Diego tells the prehistory of the San Diego area as recorded in the layers of sedimentary rocks. The land here has risen and fallen independently from the sea level which also has risen and fallen. The ever-changing landscapes and animal life through time are examined in this book. Numerous field-trips direct the reader to key localities to observe and understand the history stored in the rocks. Author Patrick L. Abbott has been a Professor of the Department of the Geological Studies, San Diego State University for the last 20 years. Over 60 articles in various publications and more than 20 published books have given him a deserved reputation as a prolific author and a recognized authority on the geology of San Diego County. He is a popular lecturer and field-trip guide who is frequently called upon by the media to interpret geological phenomena to San Diego residents.

An excellent book! I find myself continuously recommending it. Fascinating from a geology and local interest point of view. I'll never look at La Jolla, Mission Bay and Point Loma the same way again.

AN EXCELLENT BOOK FOR THE AMATEUR GEOLOGIST, WHETHER YOU LIVE IN SAN DIEGO OR NOT. SO MANY QUESTIONS ARE ANSWERED IN A WAY THAT IS EASILY UNDERSTOOD. VERY WELL WRITTEN, AND VERY THOROUGH. I SEE SAN DIEGO IN A WHOLE NEW LIGHT. THANKS

I took geology as a minor in college and this is one of the best books to describe the complex geology of the San Diego region. Pat Abbott has been on local channels many times explaining world geologic events and is always a favorite. I strongly recommend this book for its interesting treatment of a complex subject. After reading this book, you will view San Diego topography in a different light.

I personally liked very much. It is very interesting and detailed. However, if you don't have a background in geology it will probably seem too heavy to read.

Needed it for just a Geo Class Field Trip and to Finish a home work assignment. Unless you live in SD it helps.

If you live in San Diego, a must read to understand the geography and its impact on your environment.
