This review is based on the PDF version directly from Paizo.com. This latest installment in the Bestiary series follows the same formats as the previous Bestiaries, and continues the iconography themes from the last two in the series. It also continues the tradition of one page one monster.

There are a couple creatures that spill over to the next page, but they reeled this in more than they did with Bestiary 4. A lot of the creatures here expand on the ecologies of creature types already in print. There are more Demons, Devils, Aeons, Archons, Angels, and Dragons. There are more than a couple new creatures also, some of which are space based. Grey Aliens, and Annunaki, inspired more by Zechariah Sitchins than the Babylonian mythology are standouts in that category. If you need more or different creatures for your game, get this book.

If you're looking for some modern threats to add into a game you want this book, very well written up to fit into a D&D type game, adapting some modern things to game play. If your character encounters some things in this book you'll be writing up a new character but that's part of the fun of the game, and a reason to buy new dice. I don't play anymore but find the material interesting to read and this doesn't fail to entertain my warped mind.

I'm a role-player who loves the new monsters in this book. Whether you're running traditional fantasy, pulp adventure, or even downright strange; you certainly can't go wrong with this on your shelf.

Great fun, but sometimes your left wondering "was this really needed?"

5 bestiaries and they are still good? Yes indeed! Paizo does it again!

Another solid source book from piazo for pathfinder.

Good product, decent monster designs that go along with their Occult Adventures product.
