# A First Course In Differential Equations: The Classic Fifth Edition (Classic Edition)

## Synopsis

The CLASSIC EDITION of Zill's respected book was designed for instructors who prefer not to emphasize technology, modeling, and applications, but instead want to focus on fundamental theory and techniques. Zill's CLASSIC EDITION, a reissue of the fifth edition, offers his excellent writing style, a flexible organization, an accessible level of presentation, and a wide variety of examples and exercises, all of which make it easy to teach from and easy for readers to understand and use.

## Book Information

Series: Classic Edition

Hardcover: 520 pages

Publisher: Cengage Learning; 5 edition (December 8, 2000)

Language: English

ISBN-10: 0534373887

ISBN-13: 978-0534373887

Product Dimensions: 8.3 x 1.1 x 10.4 inches

Shipping Weight: 2.6 pounds (View shipping rates and policies)

Average Customer Review: 3.9 out of 5 stars [See all reviews](#) (49 customer reviews)

Best Sellers Rank: #87,784 in Books (See Top 100 in Books) #31 in [Books > Science & Math > Mathematics > Applied > Differential Equations](#) #148 in [Books > Textbooks > Science & Mathematics > Mathematics > Calculus](#) #226 in [Books > Science & Math > Mathematics > Pure Mathematics > Calculus](#)

## Customer Reviews

This particular textbook concerns ordinary differential equations. There are plenty of examples, and they are worked in steps that should make the solution strategy clear to any student with at least two previous semesters of calculus. One of the unusual features of the book are essays written by mathematicians present at the end of chapters 3, 4, 5, and 9. Each essay concerns applications of concepts learned in the previous chapter. The book is well illustrated, and motivations for study are included by making the examples solve practical problems such as the charge on a capacitor, solving orthogonal trajectories of the family of a rectangular hyperbola, or even determining the half-life of a radioactive substance. This makes it ideal for engineering students. There are numerous exercises at the end of each chapter and the solutions to odd numbered problems can be found in the back of the book. The following is the table of contents:1. INTRODUCTION TO DIFFERENTIAL EQUATIONSBasic Definitions and Terminology / Some Mathematical Models /

Review / Exercises  
2. FIRST-ORDER DIFFERENTIAL EQUATIONS  
Preliminary Theory / Separable Variables / Homogeneous Equations / Exact Equations / Linear Equations / Equations of Bernoulli, Ricatti, and Clairaut / Substitutions / Picard's Method / Review / Exercises  
3. APPLICATIONS OF FIRST-ORDER DIFFERENTIAL EQUATIONS  
Orthogonal Trajectories / Applications of Linear Equations / Applications of Nonlinear Equations / Review / Exercises / Essay: Population Dynamics  
4.
