Customer Reviews

[Update: As another reviewer has noted, "How to Avoid Marrying a Jerk" and "How to Avoid Falling

in Love with a Jerk" are the same books with different titles.] Given that a choice of a marriage partner is one of the most important influences on a person's quality of life, you would think that people would want to know all there is to know about making that choice. So, what's wrong with just falling in love and getting married? According to Van Epp, people are at their best before they get married--and how happy you are when you are dating is the ceiling for how happy you can be in marriage. Don't expect it to get better. The relationships between each individual and their parents strongly influence a couple's relationship after the wedding. This new way of relating within the relationship kicks in after the marriage begins--when the role is no longer lovers and best friends, but husband and wife. So, you are marrying the person who relates to their parents in a certain way, and that way strongly influences the way that person will relate to you. Van Epp shows how one can explore this before marriage and possibly change the dynamic. Although the book is titled so that you would think that it is about not marrying a jerk, it is and it isn't. There is a part that says people have a code of what is right and wrong and an enforcer of that code within them. Some people may have an enforcer that is inactive or hardly involved. Some people may have a code that is unacceptable. Some people may have a great code of ethics and standard of behavior, but never make themselves follow it. I suspect that those who have a bad code of acceptable behavior or a bad enforcer of a good code would be considered jerks.

This is one of those books people wish they would have read, but didn't. In my case, I probably could have saved my ex-wife a lot of grief if I'd had this book to give her so many years ago.... Many books provide a list of "10 foolproof steps" at the one extreme (simplistic) or an exhausting checklist at the other. Van Epp takes a different approach. He identifies six general techniques you can use to identify a jerk before you make the mistake of marrying this person. He also provides a tool, called the Relationship Attachment Model (RAM), which has proven itself over many years of application. In fact, the RAM forms the central concept behind applying the six techniques. One of the problems with self-help books for singles seeking a mate is you have to remain objective to be able to apply the tools, tips, and techniques suggested in the book. Once a relationship is underway, doing that is difficult or impossible. We either filter out negative information and later think, "I shoulda seen that coming" or we ruin the relationship by constantly judging and appraising the other person. Epps takes these issues head on. First, the RAM allows you to pace the progression of a relationship. Without going into much detail, I'll just say Epps makes a compelling case for the sequence of know, trust, rely, commit, touch that the RAM is based on. And rather than leave us with a simplistic model, he explores its application for all stages of a dating

relationship. Second, Epps provides several case histories on the rose-colored glasses problem that occurs when we proceed too rapidly with our feelings. He identifies why this happens, and provides specific guidelines on how to handle it.
