Customer Reviews

Oh hell yes! A new release of the definitive classic! I read the original release decades ago, and even back then it was the *definitive* research exposure of L. Ron Hubbard and the Scientology organization that he created. Russel Miller had traveled the world collecting research information, collecting court and FBI documentation, interviewing witnesses, interviewing ex-operators and ex-customers of Hubbard's criminal organization, and he organized the valuable information into a well-researched, well-written expose of all things known and suspected about Hubbard and Scientology. First time readers of this new release will find details about how the Federal Bureau of Investigation (FBI) in the United States handled not only public complaints about Hubbard and his frauds but also how the FBI handled profoundly disturbed conspiracy-drenched lunatic kook-spew letters written by Hubbard to the FBI to denounce all kinds of invisible enemies that Hubbard was plagued with, from Communists and Nazis to aliens from outer space, Hubbard's profound mental

problems dripped from every letter he wrote to the FBI seeking to enlist their help in crushing invisible boogeymen. One of the most profoundly valuable sources of information that Miller acquired was a glut of "secret" documentation provided by one-time Scientology customer Gerald "Gerry" Armstrong, a man who emerged from the Scientology corporation as one of the world's best-known human rights heroes who fought against Scientology's crimes and abuses and who remains one of the world's best-loved Humanitarians working within the arena of opposing Scientology's crimes and abuses. This is a "must-read" book.
