Guide To Moab, UT Backroads & 4-Wheel-Drive Trails 3rd Edition

Synopsis

The all-new third edition Guide to Moab, UT Backroads & 4-Wheel-Drive Trails adds 25 trails and two new areas. Every trail represented has been freshly driven and documented using the latest GPS technology for extreme accuracy. Over 500 color photos show scenery as well as trouble spots. Tips and advice from local experts help to get you through the trail. All trails are BLM approved and are legal routes. More Jeep Safari trails are referenced as well, including Cameo Cliffs, the Pickle, Where Eagles Dare and Rusty Nail. After spending a few days driving Area BFE, the need for a concise and accurate overview map and directions became clear and full descriptions have been added. With this latest edition as your guide, you'll enjoy multi-day overland adventures in new areas, which include the Maze District in Canyonlands National Park and the San Rafael Swell.

Customer Reviews

I bought this book for our trip down to Moab. It was our first time going. We took it with us even though we did have GPS that had most of the trails on it. This book really helped us out for directions and what to see. There are nice pictures in it and it gives you the trail rating on how difficult it would be to manage on your UTV or Jeep. We pulled this out many times to look at along with reading our GPS in our Polaris RZR. The combination of the two was a winner. We are going back next year and bringing the book with us. We did notice that this book was sold everywhere in Moab. I think that means you should buy it. It is a great resource and we are using it already to plan our next trip. Moab is amazing and there is so much to see and do. You need to buy this book and

make a trip there.

I am in Moab as I write this. This book is perfect. I used it while driving four different trails, did the Shafer trail with a Jeep Wrangler, Hells Revenge, Fins and Things, and Hurrah Pass with a RZR 1000.

Good up to date guide for the Moab area. I think trying to rate trails for jeeps, rock crawlers, atvs and side-by sides is difficult. Actually I preferred the earlier edition that was more specific for atv's and side by sides. But still a worthwhile purchase for the area with good descriptions of the trails and the difficult spots

I love the guide especially because it is spiral bound. I haven't visited Moab yet but will in about 64 days from this review. I did have to wait for delivery because the book was printed in February and the Easter Jeep Safari was in March so it was sold out and had to wait but I wasn't in a hurry because my trip is a ways off. It is easy to read and understand the levels of trails. I will follow up when I return from Moab.

The Charles Wells guides are the best out there and have always been dead accurate for me. This newer updated version includes a few more trails than the previous print and I'm sure will come in handy on our trip this year

We just returned from 2 weeks of Jeeping in Colorado and Moab and these guide books were perfect for pre-route planning and while on the trail to identify problem areas and points of interest. Each trail is laid out in a 2-page format (except for the very technical, longer trails) and it includes a narrative with good general info, a map of the trail with waypoints, and a detailed list of turn by turn instructions laid out my mileage. Not all trails have bail out points or go-arounds for major obstacles but they are listed when present. Good info to have if you have an emergency or bite off more than you can chew on a trail. I'm a planner and I did the research on what guides to use (this is the best by far. There are separate books from this company for ATV legal trails.

We used the book and additional gpx files (separate purchase) at the 2016 50th annual Moab jeep Safari. The trails were well illustrated and the odometer tracking very useful and accurate. Will buy the Colorado version later this summer.

Love this guys books, very detailed and love how the trails are rated. Also gives a very good idea of what type of vehicle can do the trail. Stay the trail!
