# The Driver: My Dangerous Pursuit Of Speed And Truth In The Outlaw Racing World

## Synopsis

The riveting memoir of a life lived at the right-hand edge of the speedometer. Alex Roy's father, while on his deathbed, hints about the notorious, utterly illegal cross-country drive from Los Angeles to New York of the 1970s, which then inspired his young son to enter the mysterious world of underground road rallies. Tantalized by the legend of the Driver—the anonymous, possibly nonexistent organizer of the world's ultimate secret race—Roy set out to become a force to be reckoned with. At speeds approaching 200 mph, he sped from London to Morocco, from Budapest to Rome, from San Francisco to Miami, in his highly modified BMW M5, culminating in a new record for the infamous Los Angeles to New York run: 32:07. Sexy, funny, and shocking, *The Driver* is a never-before-told insider's look at an unbelievably fast and dangerous society that has long been off-limits to ordinary mortals.

## Customer Reviews

I thought this was a great read ... whenever I put the book (my Kindle actually) down, I was anxious to pick it up again and continue reading. While Alex Roy in his Team Polizei BMW M5 is engaging in

activities that are illegal -- road rallies and cross-country runs for speed, often triple digit speeds on public roads -- I couldn't help but get a vicarious guilty pleasure in hearing how these guys do it, and was impressed with the detailed planning and considerable technology involved. I'm a fan of F1 and ALMS racing, and its the endurance and off-track nature of Roy's activity that adds the spice. I'm no more likely to try to drive non-stop cross-country in 31 hours than I am to get a contract with Ferrari to drive in F1, but that doesn't mean you can't get some enjoyment out of the activities of those who do. If you're a gadget freak of any worth, you can't help but be impressed by the quantity (and high \$dollar\$ value) of the tech employed in evading traffic stops. I use a radar detector myself on long-distance trips, but Roy adds multiple scanners and CB radios, GPS's, cell phones, thermal and night vision imaging devices, night vision binoculars and even a spotter plane to his tech arsenal. If you check You Tube, you can find actual video of many of the stories/events that he tells about in the book. There may be some embellishment in the book, but not as much as you might think. The book is not Shakespeare but I think he does a good job of relating the story -- it made me feel like sort of like he was sitting across the table at the pizza joint telling me his tale. And for all those folks who are hung up on the police evading, illegal, dangerous nature of the activity ... do you watch any crime shows on TV, or any movies involving robberies?
