Customer Reviews

It is well written and at a good reading level for kids, just to misleadingA full description and illustration based on a leg bone?That would be like finding a shoe and deducing that the owner of the shoe was a 1-eyed 1-horned- flying purple people eater?Or did it have 2 eyes?The problem with this book is there is far too much creative non-fiction involved. Most of the "facts" are at best theories, none of it proved. Most of the material seems to be - here is a bone and because we have this bone we know what the animal it came from looked like, what it ate where it lived and how it lived. Even if all we have is a leg bone! Or part of a Jaw!Some interesting material, but a better separation of fact and fiction is needed, or file it under fantasy and science fiction, not reference or history.With a better separation from fact and fiction would rate it higherPassing fiction of as fact may be the trend, but I don't buy it. More actual facts and a little less fiction makes the information actually useful and not misleading.

I choose this rating because its good for any dinosaur lover's who like testing their self. I liked it because it taught me more about dinosaurs. I recommend this for anybody who likes dinosaurs and thanks for the book.

Most kids love Dinos and this book does a great job showing some pretty strange creatures in a very kid friendly way. Lots of pictures, lots of information and all written in such a way that every kid will love it.

I enjoyed the information in this book, I purchased off the kindle fire store. I am posting my honest review about this book. This Dinosaur book was quick and fun.
