# The Alkaloids: Chemistry And Biology (Volume 59)

## Synopsis

This series is world-renowned as the leading compilation of current reviews of this vast field. Internationally acclaimed for more than forty years, *The Alkaloids: Chemistry and Biology*, founded by the late Professor R. H. F. Manske, continues to provide outstanding coverage of this rapidly expanding field. Each volume provides, through its distinguished authors, up-to-date and detailed coverage of particular classes or sources of alkaloids. This latest volume comprehensively reviews the recent progress of two classes of alkaloid, the C<sub>20</sub> diterpene alkaloid and the iboga alkaloid. The former are examined in terms of their classification, distribution and occurrence as well as their spectroscopic aspects, biological activities and the determination of stereochemistry. The latter are seen through the perspectives of isolation, structure determination and synthesis and additionally reviewed in terms of their involvement in the formation of the natural and semi-synthetic bisindole alkaloids from *Catharanthus*. . The latest volume in this series of indispensable texts. Written by leading experts in the field. An essential reference tool for anyone working with alkaloids in chemistry or biology

## Book Information

Hardcover: 414 pages

Publisher: Academic Press; 1 edition (January 3, 2003)

Language: English

ISBN-10: 0124695590

ISBN-13: 978-0124695597

Product Dimensions: 6 x 0.9 x 9 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #5,817,113 in Books (See Top 100 in Books) #9 in [Books > Science & Math > Chemistry > Alkaloids](#) #413 in [Books > Medical Books > Pharmacology > Chemistry](#) #2354 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Biochemistry](#)

## Customer Reviews

Product with perfect conditions!Great book!
