Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase.

Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code.

Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase.

-- By connecting applications, modeling, and visualization, Gary Rockswold motivates students to learn mathematics in the context of their experiences. In order to both learn and retain the material, students must see a connection between the concepts and their real lives. In this new edition, connections are taken to a new level with "See the Concept" features, where students make important connections through detailed visualizations that deepen understanding. Rockswold is also known for presenting the concept of a function as a unifying theme, with an emphasis on the rule of four (verbal, graphical, numerical, and symbolic representations). A flexible approach allows instructors to strike their own balance of skills, rule of four, applications, modeling, and technology.

Customer Reviews

First off, I used 's rental on this. The book was delivered within time and was satisfied with the seller and the book itself. If you are wanting to save money, may I suggest going to the pearson web site and just simply purchasing the on line access because all of your homework is done on line through that access. There really is no need to have a book. pearson charges 90.00 or so for access.

I ordered this booklet for a course that my son will be attending in college. When I received the booklet, I wanted to see it for the content. As a retired math instructor, I was disappointed. The study guides and practice examples are good, but needs more in-depth "step-by-step" instructions to the final answer. Definitely not worth the cost of the book and the key to the website.

rental came with matlab code! SCORE!

Very expensive textbook, but \$50-60 cheaper than what my school's textbook store offered. It was \$230 at my university bookstore. There were no markings, and was in perfect condition.

The book itself was excellent but it turns out the access code is all I really needed and since this was a used book the code was no longer good.

Amazing book went over concepts very well I would definitely recommend it for a review of everything taught in a high school

Book is good but my matlab code is already used thanks for false information as claim new
