The Climb: Tragic Ambitions On Everest

Synopsis

Everest, the major motion picture from Universal Pictures, is set for wide release on September 18, 2015. Read *The Climb*, Anatoli Boukreev (portrayed by Ingvar Sigurðsson in the film) and G. Weston DeWalt's compelling account of those fateful events on Everest. In May 1996 three expeditions attempted to climb Mount Everest on the Southeast Ridge route pioneered by Sir Edmund Hillary and Tenzing Norgay in 1953. Crowded conditions slowed their progress. Late in the day twenty-three men and women—including expedition leaders Scott Fischer and Rob Hall—were caught in a ferocious blizzard. Disoriented and out of oxygen, climbers struggled to find their way down the mountain as darkness approached. Alone and climbing blind, Anatoli Boukreev brought climbers back from the edge of certain death. This new edition includes a transcript of the Mountain Madness expedition debriefing recorded five days after the tragedy, as well as G. Weston DeWalt's response to *Into Thin Air* author Jon Krakauer.

Book Information

Paperback: 416 pages

Publisher: St. Martin's Griffin; 2 paperback edition (July 16, 1999)

Language: English

ISBN-10: 0312206372

ISBN-13: 978-0312206376

Product Dimensions: 6.3 x 1.1 x 9.2 inches

Customer Reviews

The debate that still rages over the relative credibility of the various books written about the 1996 Everest disaster is remarkable both for its intensity and its longevity. The fact that people are still arguing passionately about what happened nearly four years ago is kind of mind boggling. I've been following the debate from the sidelines ever since the summer of 1996, and I read both "The Climb" (TC) and "Into Thin Air" (ITA) as soon as they came out. Since then I've read almost all the other books about the tragedy as well. And recently I read the new expanded 1999 paperback editions of TC and ITA, each of which has been revised throughout, and each of which has a lengthy new

postscript that answers charges made by the other book. If you have more than a passing interest in Everest 96, you will want to read both these new editions, even if, like me, you already read the first editions. The new dueling postscripts are mandatory reading if you want to have a better understanding of what happened. In my opinion, the truth lies somewhere between the Krakauer account and the Boukreev/DeWalt account, although I think ITA is by far the better (and more believable) book. You, however, might feel differently. Read both new editions and decide for yourself. All of the different Everest books offer slightly different versions of the same events. This probably shouldn't surprise anybody, considering the effects of altitude and extreme stress on memory. I generally give Krakauer the benefit of the doubt over the other books, though, because he was the only author who took detailed notes while he was on the mountain (a widely respected reporter and mountaineer, he was sent to Everest specifically to document the 1996 climbing season).

Anatoli Boukreev, one of the guides on Scott Fischer's ill-fated 1996 Mountain Madness Everest expedition, feeling much maligned by Jon Krakauer's article, and subsequent best-seller, "Into Thin Air" (ITA), sets out to set the record straight in "The Climb: Tragic Ambitions on Everest" (TC). While ITA is a first-person account, TC is written from a third person POV, with long passages of Boukreev recounting the events and his impressions of the events of May 1996 (translated from Russian). What comes through most is Boukreev's wish to clear his name. Having read both books, I believe that Mr. Boukreev has accomplished his goal. He did save several clients of Fischer's expedition and assisted several of the climbers from Rob Hall's Adventure Consultants expedition. Although he was not able to rescue Scott Fischer, neither were Lopsang Jangbu Sherpa or Ed Viesturs and Todd Burleson. It seems clear that Fischer succumbed to high-altitude cerebral edema. What is most amazing is how lucky the Mountain Madness expedition was. The early sections recounts the logistical problems the team faced, including problems obtaining adequate supplies of oxygen, and the toll they must have taken on Fischer. However, the only casualty of the Mountain Madness expedition was Fischer himself. In contrast, Adventure Consultants lost their leader, Hall, guide Andy Harris, and clients Doug Hansen and Yasuko Namba. In terms of readability, I believe ITA's first-person view makes it a more gripping account. Boukreev's book is too obvious an attempt to refute Krakauer. (The article Krakauer initially wrote for "Outside" must have been more critical than the book because I don't recall the latter particularly assigning blame to Boukreev.
